**Who we are**
Hewlett Packard Enterprise (HPE) advances the way people live and work. We bring together the brightest minds to create breakthrough technology solutions, searching beyond our customers' needs today and redefining what's next. Create history in an ever-evolving industry and help our customers create their future too. Join us and redefine what's next for you.

**About the Business**

HPE Networks building industry-leading, secure, AI-native networks – purpose-built with and for AI. As AI and networking converge, we're driving a bold transformation across enterprises, service providers, and cloud operators.

**Job type:** Internship + Grad Hire/ Intern Only Hire

**Selection Process:**
Pre-Placement Talk + Online Assessment + Technical Interview + Managerial Interview + HR Interview

**Job Location:** HPE India Locations (Bangalore)

**Internship Duration:** 6 Months (February 2027 to August 2027)
**Full Time Start Date :** Sep 2027

**HPE University Hiring Program**

**Are you ready to give your career the boost it deserves?**

HPE India is one of the country's leading research and development organizations, and we're one of the first multinational corporations to start operations in Bangalore. Our business interests span Networking, Product R&D, Product Planning, Marketing, Sales, Services and Customer Support. The technology footprint includes products and technologies across the Edge & Core Compute, High-Performance Compute (HPC), Storage, Networking, Converged,Composable Infrastructure, Cloud, Security, Intelligent Edge, AI/ML, Telco/Communications Platforms as well as an advanced incubation and development center. More than 3000 engineers work in these areas with many playing global roles and defining strategy for next generation HPE products, plus enjoying opportunities to work with local and international customers. The cutting-edge work of our engineers has seen a vast number of intellectual properties being generated from Bangalore.

**Job Description:**

HPE is looking to recruit engineers directly from college campuses to work on software that is required for products covering multiple areas of:

| | | | |
|---|---|---|---|
| Cloud Computing | **AI/ML** | IoT/Edge Compute | **Security & Authentication** |
| Wireless LAN/Wi-Fi | Software-Defined WAN | Network-as-a-Service | Data Science |
| **Networking Switching** | Storage | 4G/5G platforms | As-a-Service |
| Manageability Tools | Database Systems | Operating Systems | Language Compilers |

**HPE is looking to hire in these categories:**

(a) **Software Development**: Responsible for designing, coding, debugging, and testing software to develop and enhance mission critical solutions.

(b) **Software Automation & Quality Assurance**: Responsible for developing and automating functional, endurance, stress, performance tests to support enterprise class products and solutions

We are seeking a highly motivated intern to join the HPE Technical Assistance Center (TAC) or GDC.

This role offers a unique opportunity to work across Juniper's Campus (EX, QFX), Routing (M/T/Mx/PTX/ACX), and Security (SRX) products. As an intern, you will gain hands-on experience in network technologies, problem-solving, and customer support within a global TAC environment.

**Key Responsibilities:**

Collaborate with senior TAC/GDC engineers to diagnose and resolve complex network issues across Switching, Routing, and Security platforms.

Assist in gathering detailed problem reports from customers, analyzing network environments, and documenting findings.

Learn to take ownership of initial troubleshooting steps, escalating issues when required, and ensuring timely follow-up.

Participate in lab simulations to replicate customer environments and validate solutions.

Engage in ongoing learning by staying current with evolving technologies in Switching, Routing, and Security.

Work closely with team members to strengthen knowledge sharing and contribute to the customer support process.

Be adaptable to support business needs, including occasional weekend or holiday work.

**Build Your Career Here:** There are exciting opportunities for you to work in different technology areas while working on Enterprise class products and solutions. These include Operating Systems, File Systems, Firmware, Storage technologies, Networking, System Security, Virtualization, multi-core architecture,

Database internals, Open Stack, Data Science and Cloud Monitoring technologies.

"At HPE, we believe in giving team members the power to shape their experience. That's why we have a hybrid, flexible work model — one that ensures connectivity, a commitment to our culture, and continued impact for our team members. It's the evolution of hybrid work at HPE, Hybrid work means finding a healthy balance between working in the office and working remotely".

**Mandatory Skills:**

Strong interest in networking fundamentals and technologies, including routers, switches, firewalls, and security concepts (e.g., access control, VPNs, intrusion detection).

Solid understanding of networking basics: IP addressing, TCP/UDP, VLANs, OSI model, and common protocols (ARP, ICMP, DNS, DHCP).

Familiarity with switching technologies such as xSTP, VRRP, LACP, Dot1x, COS, QOS

Knowledge of Layer 3 protocols VRRP, BGP, OSPF, ISIS , RIP

Exposure to security concepts, such as VPNs, firewalls, and perimeter protection and Knowledge related to application technologies like NIS, NFS, SunRPC, MS-RPC etc. in a security enabled environment.

Strong analytical and problem-solving abilities.

Excellent verbal and written communication skills.

Quick learner with a passion for technology and continuous improvement.

**Prerequisites:**

- Graduate Degree – BE/B.Tech – 2027 batch in Circuit Branches (CSE, EC, EE, IT etc.) (with AI)
- JUNOs Certification Mandatory
- Minimum CGPA of 7/10 in UG and 80% in $10^{th}$ and $12^{th}$ (No active arrears)
- Excellent written and verbal communication skills
- Good problem solving and analytical skills
- Ability to collaborate and work well in team environments
- Strong Programming Skills and Understanding of operating systems

**At HPE, you have the opportunity to redefine what's next for you. Are you what's next at HPE?**
