New Delhi

SUMMARY

I'm a motivated Data Science and Engineering student with hands-on experience and knowledge in Machine Learning, Data Analytics, database systems and algorithms. I'm passionate about building data-driven applications and exploring innovative technologies. I'm looking for opportunities where I can apply my technical knowledge, contribute to meaningful projects, and make a real impact.

EDUCATION

Manipal institute of Technology (2023-2027)

B.Tech in Data Science and Engineering - **CGPA-8.35**.

Manav Sthali School, New Delhi

Higher Secondary - **Percentage - 89%**

Manav Sthali School, New Delhi

Senior Secondary - **Percentage - 93%**

COURSEWORK

- Machine Learning and Data Analytics
- Database Management Systems
- Basic Electrical & Electronics Engineering
- Math for Data Science (Probability & Statistics, Stochastic Processes)
- Operating Systems
- Data Structures & Algorithms (C++)

PROJECTS

Drone Development & Gesture Control Exploration (Arduino, Embedded Systems)

- Built a functional quadcopter using flight controller and experimented with gesture-based control using MPU6050 and Flex sensors with proper ESC calibration.
- Programmed embedded systems in C++, developed control logic for gesture recognition and motion mapping.
- Explored PCB design, microcontroller interfacing, and hardware components such as BJTs and MOSFETs.

Music Recommendation System (Python, Machine Learning, Data Analytics)

- Built a personalised music recommendation system using a Spotify dataset (1M+ tracks), predicting top 10 song suggestions with models like KNN, XGBoost, and ensemble classifiers.
- Evaluated model performance using F1-score, classification reports, and other key metrics; integrated visualizations for interpretability and insight.
- Developed a user-friendly Streamlit interface for real-time recommendations used pandas, NumPy, scikit-learn, Matplotlib, and Seaborn for data preprocessing and model training.

Payroll Management System (Oracle SQL, PL/SQL)

- Designed and implemented a payroll management solution for automated salary processing and attendance tracking. Created complex SQL triggers, functions, and relational queries for tax calculation and payroll updates.
- Gained strong understanding of database structuring, relational algebra, and Oracle SQL Plus environment.

SKILLS

Languages: C++, Python, SQL, Java

Libraries & Tools: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn

Hardware & IoT: Arduino, Sensors, Embedded Programming, Basic PCB Design

Soft Skills: Good communication, collaboration, conflict resolution, problem solving, creativity
